## INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.

PCT/SE2003/001248

Box	No. V	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
_	<b>a.</b> .	

#### 1. Statement

Novelty (N)	Claims Claims	1-33	YES NO
Inventive step (IS)	Claims Claims	1-33	YES NO
Industrial applicability (IA)	Claims Claims	1-33	YES NO

#### 2. Citations and explanations (Rule 70.7)

New amended claims have been filed on 14 October 2005. The amendment has resulted in a limitation of the scope of claims 1 as the definition of claim 2 has been introduced in claim 1 and the former claim 2 has been deleted. The same limitation has been made in claim 13 (former claim 14), whereby the former claim 15 has been deleted. The claims have been renumbered.

The claimed invention relates to sanitizing compositions containing a sulfite salt, a C2-C10 carboxylic acid and an alcohol. The object of the invention is to provide a sanitizing composition that is based on natural materials and is of food-grade.

Reference is made to the following documents:

- D1) EP 0640285 A1
- D2) WO 0194513 A1
- D3) WO 9746218 A2
- D4) Database WPI, AN 2000-621108, JP 2000201559 (Abstract)
- D5) STN International, File CAPLUS, AN 1983:401813, DN 99:1813
- D6) WO 9639842 A1

The document D2 is regarded as being the closest prior art to the subject-matter of the claims, and discloses: a sanitizing composition comprising sulfates or sulfonates such as alkyl sulfates (0,01-5%), an acid such as lactic acid (0,01-5%) and an alcohol (0,25-10%).

The subject-matter of the claims therefore differs from this known D2 in that: the sulphur-containing salt is an alkali or alkaline earth metal sulfite instead of an alkyl sulphate.

#### INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

PCT/SE2003/001248

Supplemental Box

In case the space in any of the preceding boxes is not sufficient. Continuation of: Box V

Sulfates and sulfonates are known surfactants, while sulfite is a known biocid

The applicant has further shown that compositions containing both sodium sulfite and lactic acid have a better bactericid effect than compositions containing only one of these substances.

Thus, the invention according to claims 1-33 of the present application is considered to meet the requirements of the PCT with respect to novelty and inventive step.

### INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.

PCT/SE2003/001248

Box No. VIII Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

Although claims 1 and 13 have been drafted as separate independent claims, they appear to relate effectively to the same subject-matter and to differ from each other only in respect of the terminology used for the features of that subject-matter.

The only difference between claim 1 and claim 13 is that "by weight of a sulphur-containing salt" in claim 1 reads "by weight of an inorganic sulphur-containing salt" in claim 13. As the sulphur-containing compound now has been limited to alkali or alkaline earth metal sulfite salt, which are inorganic compounds, the content of the claims are exactly the same.

Thus, claims 13-24 are equal to claims 1-12, and could be excluded.

# Claims
